## Education

|                                                                                          |                                     |
|------------------------------------------------------------------------------------------|-------------------------------------|
| <b>Ph.D. program in Electrical and Computer Engineering</b><br>Seoul National University | Seoul, Korea<br>Mar 2022 - present  |
| • Advisor: Prof. Bohyung Han                                                             |                                     |
| <b>B.S. in Statistics and Mathematics</b><br>Seoul National University                   | Seoul, Korea<br>Mar 2015 - Aug 2021 |
| • Summa Cum Laude                                                                        |                                     |
| • GPA: 4.0/4.3                                                                           |                                     |
| <b>Seoul Science High School</b><br>Seoul Science High School (SSHS)                     | Seoul, Korea<br>Mar 2012 - Feb 2015 |

## Experience

|                                                  |                                     |
|--------------------------------------------------|-------------------------------------|
| <b>Adobe Research</b> , Research Intern          | Seattle, USA<br>Jun 2024 - Sep 2024 |
| <b>SNU Computer Vision Lab</b> , Research Intern | Seoul, Korea<br>Jun 2021 - Sep 2021 |

## Current Research

|                                                                                                                                             |                                |
|---------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>Replayable and Realistic Limit Order Book Message Generation</b><br>Advised by Prof. Bohyung Han, in collaboration with Prof. Kiseop Lee | Seoul, Korea<br>2026 - present |
| • Developing a generative model for limit-order-book messages that are replayable against the current order-book state.                     |                                |
| • Developing post-training methods to improve the realism of long-horizon market rollouts.                                                  |                                |

## Selected Publications

|                                                                                                                                                                       |              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Probabilistic Signature Inversion: Learning Conditional Distributions from Truncated Signatures</b><br><u>Junoh Kang</u> , Kiseop Lee, Bohyung Han                 | arXiv 2026   |
| <b>ICM-SR: Image-Conditioned Manifold Regularization for Image Super-Resolution</b><br><u>Junoh Kang</u> <sup>*</sup> , Donghun Ryu <sup>*</sup> , Bohyung Han        | arXiv 2025   |
| <b>STR-Match: Matching SpatioTemporal Relevance Score for Training-Free Video Editing</b><br>Junsung Lee, <u>Junoh Kang</u> , Bohyung Han                             | arXiv 2025   |
| <b>Enhanced Diffusion Sampling via Extrapolation with Multiple ODE Solutions</b><br>Jinyoung Choi, <u>Junoh Kang</u> , Bohyung Han                                    | ICLR 2025    |
| <b>FIFO-Diffusion: Generating Infinite Videos from Text without Training</b><br>Jihwan Kim <sup>*</sup> , <u>Junoh Kang</u> <sup>*</sup> , Jinyoung Choi, Bohyung Han | NeurIPS 2024 |
| <b>Observation-Guided Diffusion Probabilistic Models</b><br><u>Junoh Kang</u> <sup>*</sup> , Jinyoung Choi <sup>*</sup> , Sungik Choi, Bohyung Han                    | CVPR 2024    |
| <b>Open-Set Representation Learning through Combinatorial Embedding</b><br>Geeho Kim, <u>Junoh Kang</u> , Bohyung Han                                                 | CVPR 2023    |

## Honors and Awards

---

|                                                                 |             |
|-----------------------------------------------------------------|-------------|
| <b>Youlchon AI Star Scholarship</b>                             | 2025        |
| <b>Gold medal on Samsung Humantech Paper Award</b>              | 2025        |
| <b>Dean's List</b>                                              | 2016, 2020  |
| <b>Presidential Science Scholarship</b>                         | 2015 - 2020 |
| <b>Bronze medal on high school Korean Mathematical Olympiad</b> | 2013        |
| <b>Silver medal on Samsung Humantech Paper Award</b>            | 2012        |

## Academic Services

---

**Conference Reviewer:** NeurIPS 2025, AAAI 2025, WACV 2026, NeurIPS 2026, CVPR 2026

## Teaching
